

Plaster additive

DESCRIPTION

MORTARMATE N / R is an air entraining and fluidizing liquid mortar admixture used for workability in ready-to-use stabilized plaster mortar. Depending on the request, there are types with the normal socket (N) and extra delay (R) feature.

STANDARDS

Suitable for EN 934-3 norms.

USAGE AREAS

In brick and block building materials, mortar or ready-mix mixture produced in the construction site Fine and coarse plaster Features / Advantages

- Increase the effect of mixing water by decreasing surface tension in mortar, The whole mass contains homogeneously dispersed micro-air bubbles, - Increases machinability,
- Reduce the structural load by dragging air up to 20% in mortar,
- Improve the sand: cement ratio by improving cohesive in mortar,
- Cement saves and reduces wastage.

DOSAGE AND ADMINISTRATION

Mortarmate is added to the mixture water in the required amount, Pre-prepared dry sand and cement blend are added. Mixing should be continued until a uniform consistency is achieved Compatible with all cement types. It can also be used with lime. Consumption 0.1-0.5% by weight of cement (100-500 g for 100 kg of cement).

The optimum amount of additive may vary depending on the desired workability of the mortar and the working temperature and the quality of the kum.

PHYSICAL PROPERTIES AND TECHNICAL DATA

Chemical Structure	Surface active polymer material
Appearance	Coffee colored liquid
Density	1.05 ± 0.02 kg / L
pH	7,00 - 9,00

STORAGE AND SHELF LIFE

The waiting period is 1 year without opening.

PACKAGING

20 kg plastic drums, 200 kg drums were presented to the market.

HEALTH & SAFETY INFORMATION

Mortarmade N / R is a neutral liquid. There are no substances harmful to human and environmental health in its structure. Appropriate protective clothing, gloves, goggles and mask should be used during application. Avoid contact with skin and eyes. In case of contact, the contact area should be washed with plenty of water. If swallowed, consult a doctor.

For further information, see the Safety Data Sheet (MSDS). Our Mortarmade N / R product is EN ISO 9001: 2000 Quality Direction
